Education

New York University

Master's, Computer Science

New York, NY

Expected May 2027

Coursework: Software Engineering, Foundations of Data Science, Artificial Intelligence, Blockchain, Design and Analysis of Algorithms.

Vellore Institute of Technology

Bachelor of Technology in Computer science (CGPA: 3.8/4)

Vellore, India

Sep 2021 – Aug 2025

Coursework: Data Structures algorithm, Artificial intelligence, Deep Learning, Operating Systems, Software Engineering, Natural language processing, System design.

Professional Experience

Tech Mahindra

February 2025 – June 2025

Software Research Intern

Hyderabad, AP, India

- Improved summary accuracy for large multilingual texts by **18%** by integrating LSTM and reinforcement learning techniques for multi-hop reasoning and path detection within the GRAGFlow framework.
- Reduced hallucinations in text summarization outputs by **25%** through the implementation of Leiden community detection and embedding-based hallucination mitigation techniques, supported by rigorous testing and debugging.
- Accelerated development cycles by **30%** by coordinating agile workflows, managing project timelines, conducting code reviews, and leveraging Git for version control and collaboration.

Quadrant Technologies

September 2023 – February 2024

Software Engineering Intern

Hyderabad, India

- Built and deployed an AI-powered chatbot using Django, React.js, MongoDB, REST APIs, and OpenAI APIs, increasing user engagement by **40%** through intelligent conversational workflows.
- Designed and maintained CI/CD pipelines using Git, Jenkins, Docker, and Kubernetes, automating testing, linting, and container image builds deployed to AWS ECR and Kubernetes clusters on AWS EC2.
- Improved system reliability by **30%** by implementing Grafana-based monitoring and alerting while actively participating in Agile practices including stand-ups, sprint planning, and backlog refinement using Jira.

Academic Projects

HireLink: Full-Stack Job Portal (Next.js, Node.js, GraphQL, Redis)

Oct 2024 – Jan 2025

[Link to project](#)

- Designed and developed a microservices-based full-stack job portal using Next.js and React.js, building REST and GraphQL APIs backed by MongoDB and PostgreSQL.
- Automated CI/CD workflows using GitHub Actions to test and validate backend code, reducing deployment errors and improving release reliability.
- Integrated WebSockets for real-time notifications, reducing redundant API polling by **40%** and lowering backend request load.
- Implemented Redis caching to reduce repeated database queries by approximately **30%**, improving response latency.

School Management System (Node.js, GraphQL, AWS, Kafka)

Aug 2024 – Nov 2024

[Link to project](#)

- Built a full-stack school management system using the MERN stack with GraphQL APIs, reducing over-fetching and improving frontend data efficiency by **30%**.
- Developed backend services using Node.js, MongoDB, and PostgreSQL, deployed on AWS EC2 with S3 for storage.
- Integrated Apache Kafka to support asynchronous workflows including notifications and activity events.
- Improved system reliability through CI/CD pipelines and database optimizations, achieving **99.9% uptime**.

IRCTC Tatkal Booking Automation (Python, Selenium, OpenCV, XPath)

May 2024 – Jun 2024

[Link to project](#)

- Developed a Python automation script using Selenium WebDriver to automate Tatkal ticket booking on the IRCTC website.
- Implemented CAPTCHA-solving mechanisms using third-party libraries to automate user verification and improve booking success rates.
- Integrated dynamic form-filling logic for train details, passenger data, and payment credentials to ensure reliable execution.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL, R, C/C++

Full Stack Development: HTML, CSS, React.js, Express.js, Node.js, Next.js, MongoDB, NoSQL, MySQL

DevOps and Infrastructure: CI/CD, Docker, Kubernetes, Jenkins, Groovy, Monitoring and Logging

Frameworks and Libraries: PyTorch, TensorFlow, Keras, Scikit-learn

Project Management: Agile, SCRUM, JIRA

Soft Skills: Problem Solving, Adaptability, Attention to Detail, Communication, Teamwork

Open Source
